

## Ashburton Town Council

### 423: Market Close, TQ13 7DS

#### Description of asset offered

Section of the car park that is not reserved for residents

#### Comments received on Public Open Day, 31st January 26, 11am-3pm:

- Parking permits would be a good idea; they guarantee spaces for residents.
- Primarily used by residents of adjacent housing; permits for residents are a good way forward.
- It must remain as car parking used by tenants.
- There are approximately 72 parking spaces; annual fees could bring money to the Town Council.
- Welcome income being generated for the Town Council.
- A sensible daily price would not cost much per day.
- Should be kept, but green space should also be available for those who use it more frequently.
- Permit places could generate income for Teignbridge or the Town Council.
- Parking is essential; consider permits, pay and display, or a combination.
- Keep it; charge for parking.
- Could hopefully generate income.
- Useful town parking; keep as parking with income from permits.
- It would be good to have additional parking at this location.
- In a very busy area; vehicles everywhere; sufficient parking needed.
- Install parking meters.
- Useful for town parking; Town Council could receive the income.
- Should remain as public parking, not just for permit holders.
- Ashburton needs parking.
- Useful asset contributing to the town centre.
- We need all the parking we can get; roads and junctions are under pressure.
- Do residents need this (presumably yes)? If not, could it be used to raise money to prevent parking outside the Post Office on St Lawrence Lane and at the school pick-up?
